NeuRemedy[®]

for
Numbness
Tingling
Burning
Shooting Pain
 in your feet and legs

Ask your doctor

What Is NeuRemedy?

NeuRemedy is a nutritional formulation dispensed by physicians to their patients suffering from numbness, tingling, burning and/or shooting pains to the feet and legs.* Such symptoms are commonly associated with diabetes, advanced age, excess alcohol consumption, chemotherapy and/or nerve injury. The physician-formulated NeuRemedy line of products is sold exclusively to patients through physicians' offices.

How Does NeuRemedy Work?

Deficiency of the micronutrient thiamine (vitamin B1) can cause numbness, tingling, burning and/or shooting pains in the nerves of the feet and legs. This commonly occurs with diabetes, advanced age, excess alcohol consumption, chemotherapy or nerve injury. The key ingredient in NeuRemedy is a specialized highly bioactive form of the micronutrient thiamine. NeuRemedy safely, rapidly and effectively reverses thiamine deficiency, nourishing the nerves of the feet and legs allowing them to work properly.

How Long Does it Take for NeuRemedy to Work?

NeuRemedy works fast. When NeuRemedy is taken properly, most people feel improvement within 30 days.

Nourishes the Nerves**

Who Should Take NeuRemedy?

People suffering from numbness, tingling, burning and/or shooting pains to the feet and legs. Ask your doctor if NeuRemedy is right for you.

What are NeuRemedy Plus and NeuRemedy Ultra?

In addition to the highly bioactive form of the micronutrient thiamine in NeuRemedy, NeuRemedy Plus and NeuRemedy Ultra contain vitamin B12. The reversal of vitamin B12 deficiency is often helpful in restoring proper nerve function. People taking a drug commonly used in the treatment of diabetes, Metformin, are often vitamin B12 deficient. Other common causes of vitamin B12 deficiency are medications for acid indigestion and a vegetarian diet.

Is NeuRemedy Safe?

Yes, the ingredients in NeuRemedy are very well studied and are extremely safe. NeuRemedy may be safely taken with other medications and nutrients.

“I Have Numbness, Tingling, Burning and/or Shooting Pains in my Feet and Legs. How Can I Start on NeuRemedy?”

The NeuRemedy line of products is available to you through your physician's office. Ask your physician if NeuRemedy is right for you.
